# Meeting Log – 6

Objective: Wrap up group project and assign tasks

---

## Members Present

- Aiden (meeting-logger)
- Sam (admin)
- Jorge (tech coordinator)

- Jack (debugger/tester)
- Daniel (head of design)
- Liam (lead developer)

## Brainstorming Session

- Tasks
- Should we have a front-end
- How should we demo project
- Need queries
- Demo scheduling constraints

---

## Tasks allocated

- Aiden: Took notes over meeting, created log, & created first 3 queries
- Sam: Created an in-depth database report
- Jorge: Created an in-depth database report
- Daniel: Created 3 queries, smashed mock data bugs, & inserted more data
- Liam: Created 3 queries
- Jack: Created 3 queries

Tasks completed during meeting time.

---

## Follow-up Actions

Verify queries & submit! TAs/professor will be able to demo our project easily with instructions created in part-6 of our Github repository. No more meetings.
